THE APPLICATION IDENTIFIED ABOVE HAS BEEN EXAMINED AND IS ALLOWED FOR ISSUANCE AS A PATENT. PROSECUTION ON THE MERITS IS CLOSED. THIS NOTICE OF ALLOWANCE IS NOT A GRANT OF PATENT RIGHTS. THIS APPLICATION IS SUBJECT TO WITHDRAWAL FROM ISSUE AT THE INITIATIVE OF THE OFFICE OR UPON PETITION BY THE APPLICANT. SEE 37 CFR 1.313 AND MPEP 1308.

THE ISSUE FEE AND PUBLICATION FEE (IF REQUIRED) MUST BE PAID WITHIN THREE MONTHS FROM THE MAILING DATE OF THIS NOTICE OR THIS APPLICATION SHALL BE REGARDED AS ABANDONED. THIS STATUTORY PERIOD CANNOT BE EXTENDED. SEE 35 U.S.C. 151. THE ISSUE FEE DUE INDICATED ABOVE DOES NOT REFLECT A CREDIT FOR ANY PREVIOUSLY PAID ISSUE FEE IN THIS APPLICATION. IF AN ISSUE FEE HAS PREVIOUSLY BEEN PAID IN THIS APPLICATION (AS SHOWN ABOVE), THE RETURN OF PART B OF THIS FORM WILL BE CONSIDERED A REQUEST TO REAPPLY THE PREVIOUSLY PAID ISSUE FEE TOWARD THE ISSUE FEE NOW DUE.

HOW TO REPLY TO THIS NOTICE:

I. Review the SMALL ENTITY status shown above.

If the SMALL ENTITY is shown as YES, verify your current SMALL ENTITY status:

A. If the status is the same, pay the TOTAL FEE(S) DUE shown above.

B. If the status above is to be removed, check box 5b on Part B - Fee(s) Transmittal and pay the PUBLICATION FEE (if required) and twice the amount of the ISSUE FEE shown above, or

Reasons for Allowance

1. Examiner has reviewed and considered Applicant's modifications as indicated in the Advisory Action of 06/17/2008 and claims 3, and 5-10 are now in condition for allowance.

The following is an Examiner's statement of reasons for allowance.

The prior art of record does not teach and/or fairly suggest at least the limitations of:

A compiler device for optimizing a program which manipulates a character string, the compiler device including at least

"... an append instruction detection unit for detecting an append instruction to append a character string to a string variable for storing a character string, in the program

a store code generation unit for generating, as a substitute for each of a plurality of the append instructions detected by the append instruction detection unit, a store code for storing data of an appendant character string to be appended to the string variable by the append instruction into a buffer, the plurality of append instructions appending the character strings to the same string variable; and an append code generation unit for generating an append code for appending a plurality of the appendant character strings to the string variable, at a position to be executed before an instruction to refer to the string variable in the program

a reference instruction detection unit for detecting a reference instruction which first refers to the string variable after the character strings have been appended

to the string variable by the plurality of append instructions, wherein the append code generation unit generates the append code at a position to be executed after the store codes and before the reference instruction; wherein the append instruction detection unit detects, as the append instruction, a combination of: an instruction to convert an immutable string variable in which a process of appending a character string is not allowed, into a mutable string variable in which a process of appending a character string is allowed; an instruction to append the appendant character string to the mutable string variable; and an instruction to convert the mutable string variable into the immutable string variable” as recited in such a manner in independent claim 3; and similarly

“...a mutable-to-immutable conversion instruction detection unit for detecting a mutable-to-immutable conversion instruction to convert a mutable string variable in which a process of appending a character string is allowed, into an immutable string variable in which a process of appending a character string is not allowed; the processor further including:

an immutable-to-mutable conversion instruction detection unit for detecting an immutable-to-mutable conversion instruction to convert the immutable string variable into the mutable string variable; and the processor further including an instruction elimination unit for eliminating the immutable-to-mutable conversion instruction and for causing the mutable string variable to be used as the mutable string variable obtained after the immutable-to-mutable conversion instruction, if an instruction to be executed between the mutable-to-immutable

conversion instruction and the immutable-to-mutable conversion instruction does not modify a character string stored in the mutable string variable, and if an instruction to be executed between the immutable-to-mutable conversion instruction and use of the mutable string variable instruction does not modify any of the mutable string variable used as the source variable of the mutable-to-immutable conversion instruction and the mutable string variable” as recited in such a manner in independent claim 5.

Therefore, all pending claims 3, and 5-10 are in condition for allowance.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “comments on Statement of Reasons for Allowance.”
